

NIRMITHA M

nirmitham0@gmail.com || [LinkedIn](#) || +91 9008290828 || Hassan, Karnataka

Profile Summary

Motivated BCA graduate with a solid foundation in Python, web technologies, and Artificial Intelligence. Gained hands-on experience through internships and projects involving Machine Learning models, NLP, and full-stack AI systems. Driven to learn emerging technologies and apply them to solve real-world problems in a dynamic professional environment.

Education

Bachelor of Computer Application (BCA) AVK College for Women, Hassan Hassan University	Sep 2023 - May 2026 CGPA: 8.2/10
Pre-University Course (PUC) BGS PU College, Arkalgud	2021 - 2023 Percentage: 77%
Secondary School Leaving Certificate (SSLC) Christha Jyothi School, Arkalgud	2020 - 2021 Percentage: 73%

Technical Skills

- **Languages:** Python, SQL **Web Technologies:** HTML, CSS, JavaScript
- **AI Domains:** Machine Learning, Natural Language Processing, Computer Vision
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Scikit-learn, NLTK, Flask, Bootstrap
- **Tools & Database:** VS Code, Git, GitHub, Figma, PowerBI, MySQL

Projects

AI-Powered Analytics System

Python | ML | NLP | Scikit-learn | NLTK | MySQL | Flask | Bootstrap

- Built an end-to-end e-commerce web platform with an admin analytics dashboard using Matplotlib for interactive real-time KPI visualization, backed by an event-logging system that tracks user activity for reporting.
- Implemented VADER sentiment analysis on customer reviews and trained a K-Means clustering model to segment customers into behavioral groups based on order frequency and spend.
- Automated report generation in 3 formats (PDF, Excel, CSV) for eliminating manual reporting.

Auto Insurance Fraud Detection System

Python | Flask | MySQL | Scikit-learn | Pandas | NumPy

- Developed a machine learning-based system to detect fraudulent claims by classifying structured insurance claim data.
- Implemented data preprocessing, feature extraction, and evaluation metrics using Decision Tree, Naive Bayes, and KNN.
- Evaluated performance metrics using confusion matrices to improve fraud detection performance and processing efficiency.

Internship Experience

User Interface/User Experience Design

Jan 2026 - Mar 2026

Bitswiper & Tekeq - Collaborative Internship Program | Tools: Figma, Canva, draw.io, overleaf, GitHub

- Designed user-centric interfaces by applying Design Thinking, creating user flows, wireframes, navigation, high-fidelity UI designs, and clickable prototypes in Figma.
- Performed UX research, usability analysis, literature review to develop research-backed design solutions.

Certifications

• Neural Networks for Computer Vision and NLP - NPTEL	(Jan-Apr 2026)
• Artificial Intelligence - Infosys Springboard	(May 2026)
• Data Analysis with Python - Infosys Springboard	(June 2026)
• Statistics for Data Science - Infosys Springboard	(June 2026)
• Python Programming Languages - Great Learning and Udemy	(Aug, Dec 2025)
