Summary

Motivated B.Tech graduate with a solid foundation in Python development, Full-stack web technologies, and Artificial Intelligence. Gained hands-on experience through internships and projects involving Application Development, Data preprocessing, Machine Learning models, and Deployment. Enthusiastic about contributing to real-world engineering solutions.

Education

B.Tech in Artificial Intelligence and Machine Learning

Mohan Babu University, Tirupati

2022 - 2026

CGPA : **9.60**

Intermediate (XIIth)

Medha Junior College, Mydukur

2020 - 2022

Percentage : **97.9%**

Xth

Siva Surya High School, Mydukur

2019 - 2020

Percentage : **96.3%**

Professional Experience

AI Intern | Infosys Spring Board

10/2025 - 12/2025

- Developed QueryTube AI, an intelligent video search platform using semantic search, vector embeddings, and ChromaDB, enabling natural-language retrieval of YouTube content with high accuracy and low latency.
- Built a scalable backend with FastAPI, supporting CSV ingestion, vector indexing, top-K similarity search, and metadata enrichment.
- Integrated Google Gemini AI to generate automated, concise video summaries and built a fully responsive Flask UI with real-time search results, deep linking, and dynamic summary generation.

AIML Intern | Edunet Foundation (APSSDC)

06/2024 - 07/2024

- Built an end-to-end machine learning pipeline using Linear Regression to predict employee burnout, achieving a **92% R² score**.
- Performed exploratory data analysis, feature engineering, and model evaluation to identify key workplace burnout indicators.
- Developed and deployed a Flask-based web application on Render for real-time prediction and accessibility.

Projects

CodeGPT – AI-powered Code Assistant

[GitHub](#) | [LiveDemo](#)

- Built an AI-powered coding assistant using Streamlit, Google Gemini 1.5 Flash and deployed on Streamlit Cloud.
- Implemented features like bug detection & fixing, code explanation, refactoring, language detection, and code translation across multiple programming languages.
- Enabled history tracking and handwriting-to-digital code conversion for an enhanced developer experience.

VidyaAi – A Full Stack AI Powered learning platform

[GitHub](#) | [LiveDemo](#)

- Built a full-stack web platform that provides free education for underprivileged students, implementing course recommendations, multilingual AI chatbot, and mentor-student connectivity features.
- Developed interactive quizzes, discussions, and gamified modules to enhance student engagement.
- Engineered a scalable backend and responsive frontend with seamless AI integration and real-time features.

Heart Disease Prediction

[GitHub](#) | [LiveDemo](#)

- Developed a Machine Learning Classification model to predict heart disease based on patient health metrics.
- Achieved 98 % accuracy using Random Forest, outperforming Logistic Regression, KNN, SVC.
- Built an interactive Flask web application and deployed it on Render for real-time predictions.

Task Manager - Web App

[GitHub](#)

- Built a full-stack Task Management System using Flask with local MySQL integration for secure data storage.
- Implemented features like user authentication, task creation, updates, filtering, and a dashboard.
- Built a clean UI using HTML, CSS, and Bootstrap, ensuring smooth interaction and optimized database performance.

Technical Skills

- Programming Languages:** Python, Java, SQL
- AIML Technologies:** Machine Learning, Neural Networks, Deep Learning, Natural Language Processing, Data Science
- Web Development:** Flask, HTML, CSS, JavaScript, Streamlit
- Databases:** MySQL, SQLite
- Cloud and Platforms:** Streamlit Cloud, Render, ServiceNow
- Tools:** Git, GitHub, VS Code, Google Colab, Jupyter Notebook
- Concepts:** Object Oriented Programming, Data Structures & Algorithms, DBMS, SDLC

Certifications

- Certified System Administrator** - ServiceNow (2025)
- Certified Application Developer** - ServiceNow (2025)
- Data Science Professional** - Oracle (2025)
- Generative AI Professional** - Oracle (2025)
- Python for Data Science** - NPTEL (2023)

Achievements/Awards

- Secured **1st Place** in ISTE Hackathon at MBU, outperforming AIML and Data Science peers.
- Solved 250+ DSA problems on LeetCode & HackerRank focusing on problem-solving and algorithmic thinking
- Completed **30 Days, 30 ML Projects** Challenge - demonstrating strong practical skills in Machine Learning.
- Top 2.37%** among 2.5L+ students in Andhra Pradesh Engineering Entrance Exam.
